

Mayank Kushwaha

Python Backend Developer | Gurgaon, India | +91-8510871020 | Mayank.kushwaha1200@gmail.com | [LinkedIn](#)

Professional Summary

Python Backend Developer with 3.8+ years of experience designing scalable backend systems and RESTful APIs using Python, Django, and Django REST Framework (DRF). Skilled in API integration, database optimization, asynchronous task processing using Celery and Redis, and backend performance tuning. Experienced in Dockerized deployments, MySQL, PostgreSQL, GitLab CI/CD, and Agile Scrum methodologies. Proven ability to build secure, high-performance applications, improve API responsiveness, and enhance backend scalability and system reliability.

Technical Skills

Programming Languages: Python, JavaScript, SQL.

Backend: Django, Django REST Framework (DRF), RESTful APIs, API Integration, Authentication & Authorization, Celery, Redis.

Database: PostgreSQL, MySQL, MongoDB.

DevOps & Tools: Docker, Jenkins, Git, GitLab CI/CD, AWS EC2, Linux, Nginx, Gunicorn, Jira, Postman.

Testing & Optimization: API Testing, Unit Testing, ORM Optimization, Query Optimization, Caching Strategies.

Work Experience

Backend Developer | AcciLives | Jhansi, India

Jun 2025 – Present

- Engineered high-performance REST APIs using Python, Django, and Django REST Framework (DRF) for healthcare workflows and third-party API integrations, improving data processing efficiency by 30%.
- Implemented Celery and Redis for asynchronous task processing, reducing notification latency by 40% and maintaining API response times below 200ms.
- Enhanced backend performance through ORM tuning, caching strategies, and efficient query handling, reducing average API response times by 35%.
- Assisted in Dockerized backend deployments using AWS EC2, Gunicorn, and Nginx for production hosting and application delivery.
- Collaborated within Agile Scrum teams to resolve production issues, reducing recurring backend incidents by 30% and improving system reliability and uptime.

Project Engineer | Wipro | Gurgaon, India

Sep 2022 – Jun 2025

- Built production-grade backend systems and API-driven services with Django and DRF, supporting 21 public-facing applications in production environments with high availability, reliability, and system stability.
- Improved MySQL query performance by 25% through indexing, query optimization, and ORM tuning, resulting in faster API response times.
- Implemented authentication and authorization mechanisms for secure API access and user management across 21 production applications.
- Streamlined deployment workflows using GitLab CI/CD and Docker, reducing deployment effort by 30% and improving release efficiency for Agile development teams.

Personal Project

Event Organizer Platform

Dec 2024 – Jan 2025

- Designed scalable backend architecture and API workflows for a Django-based event management platform, improving workflow efficiency and supporting concurrent user operations.
- Developed RESTful APIs for attendee management, event scheduling, and ticket booking, supporting secure multi-user access and concurrent booking functionality.
- Implemented JWT authentication, RBAC-based authorization, and secure CRUD operations for protected user access across multiple application modules.

- Optimized database queries and backend workflows, reducing response latency by 25% during high user activity.

Education

Raj Kumar Goel Institute of Technology, *Ghaziabad*

Bachelor of Technology: **Computer Science and Engineering** (CGPA: 8.07/10)

Aug 2018 – Jul 2022

Certifications

- Python Programming – Udemy
- Django – The Practical Guide – Udemy

Awards & Achievements

- Recognized for rapid issue resolution, strong ownership, and collaborative problem-solving while improving API reliability, reducing recurring production issues by 25%, and enhancing backend scalability.

Additional Information

- Experience deploying Django applications on AWS EC2 using Docker, Gunicorn, and Nginx.
- Strong understanding of scalable backend architecture, REST API development, caching strategies, and database optimization.
- Open to Python Backend Developer, Django Developer, and Backend Engineer opportunities.
